

Team-9 Automatic Title Generation using Encoder-Decoder Models

Please assess the work of you and your colleagues by using the following criteria. We will consider your feedback in assigning the grade for the project. Please try to be as honest and fair as possible in your assessment.

5 = Excellent work; was crucial component to group's success

4 = Very strong work; contributed significantly to group

3 = Sufficient effort; contributed adequately to group

2 = Insufficient effort; met minimal standards of group

1 = Little or weak effort; was detrimental to group

SELF Evaluation (Name: Karan Bhatt):

5 Participation in developing ideas and planning project

5 Willingness to discuss the ideas of others

5 Cooperation with other group members

5 Interest and enthusiasm in project

5 Participation in leading/facilitating discussion

5 Ease and familiarity with discussion material

PEER Evaluation (Partner 1: Dhaval Patel):

5 Participation in developing ideas and planning project

5 Willingness to discuss the ideas of others

5 Cooperation with other group members

5 Interest and enthusiasm in project

5 Participation in leading/facilitating discussion

5 Ease and familiarity with discussion material

PEER Evaluation (Partner 2: Ashish Gajera):

5 Participation in developing ideas and planning project

5 Willingness to discuss the ideas of others

5 Cooperation with other group members

5 Interest and enthusiasm in project

5 Participation in leading/facilitating discussion

5 Ease and familiarity with discussion material

PEER Evaluation (Partner 3: Vatsal Trivedi):

5 Participation in developing ideas and planning project

5 Willingness to discuss the ideas of others

5 Cooperation with other group members

5 Interest and enthusiasm in project

5 Participation in leading/facilitating discussion

5 Ease and familiarity with discussion material

PEER Evaluation (Partner 4: Vipul Barot):

5 Participation in developing ideas and planning project

5 Willingness to discuss the ideas of others

5 Cooperation with other group members

5 Interest and enthusiasm in project

5 Participation in leading/facilitating discussion

5 Ease and familiarity with discussion material

PEER Evaluation (Partner 5: Muhammad Umair Niaz):

5 Participation in developing ideas and planning project

5 Willingness to discuss the ideas of others

5 Cooperation with other group members

5 Interest and enthusiasm in project

5 Participation in leading/facilitating discussion

5 Ease and familiarity with discussion material

Self-Reflection

What did you learn from the experience?

As a part of such great group helped me to Improve my communication skills, as we need to communicate with each and every member on regular bases and that would help me to have such good communication in real-life as well. I needed to communicate with each and every member because I was the group leader. Because of this I got an experience what it takes to be a leader, what you need to face or what you need to do. It made me increase my patience level. I was able to work with different kind of people from different nation, mindset, culture, religion and many more. Within this short period, I have learned a lot like leadership, developing, involvement, communication etc.

What do you think went well?

If I try to remember everything I have done as a part of group within last few days/months it gave me a lot of stress, sleepless nights, hard work as well as fun, good people and friends. I think everything went well because of each and every member was so polite and workaholic. I think one can really enjoy working in the group with fun than working alone with stress.

What would you have done differently, given the opportunity?

I think I could be the good leader if I had more experience in the leadership. I went out of my comfort zone and did time management and project management, and all that made me more confident. I have given a lot of time and efforts to this project than expected passionately with lots of sleepless nights and hard work. By that I got to know my capabilities, patience level and ability to work independently as well as in group with fun and sometimes under pressure or stress.

Self-contribution:

Being a Team leader I have tried to give my team a good work environment by setting up meetings and discussions at everyone's feasible time so, no one's personal life disturbs and I can have healthy conversation with every member of my group as each and every persons involvement and presence is very important when you are working on a group project because one can come up with the different idea and solution which never strikes in your mind and that can help you to make everyone work easily. Even I have taken care of every member's mental health by doing fun talks and chill with them and work/talk very politely and professionally (I guess). Apart from that I helped my team to find research papers or references to learn more, Installing the necessary software's and environment in their system, creating flowcharts / work flow, Unit code testing of python and HTML files, code analysis, choosing the model which is good for our text search and use more approaches for better result, develop and train the ML model, and doing automatic testing on that, checking all the functions of application, automatic testing performed on the final code. Every step of this project helped me to learn a lot of things. My experience of working with this team was memorable and would remember this experience and cherish it entire lifelong.
